

**Description générale:**

The bank Icarus Spirit contains 128 patch directed ambient pad. She calls on all engines EXI of Kronos and requires version 3.04 of OS. Only two sounds call on easily replaceable engine SG2X by a sound of engine SGX-1 for the users of Kronos 1 or Kornos X. This bank does not call on any sample. Practically each patch with an associated drum track that it is necessary to activate because in mode off by default. This original bank was entirely programmed with Studio MDDP by Florian Damour on Kronos X.
